

Phase-1 Practice Project: Assisted Practice

8. Write a program in Java to insert and remove elements in a stack

source code:

```
import java.util.Stack;

class Elementsinstack {

    public static void main(String[] args) {

        Stack<String> animals= new Stack<>();

        animals.push("peapock");
        animals.push("rabbit");
        animals.push("parrot");
        System.out.println("Stack: " + animals);

        animals.pop();
        System.out.println("Stack after pop: " + animals);
    }
}
```

output:
