Phase-4 Practice Project

myPortfolio: Easy Way to Create Your Amazing Portfolio

Writeup

- In the third sprint, the scrum team agreed to develop the frontend of the application using an Angular framework.

- Since you were recently trained in working on this framework, you're chosen to lead this project and complete the initial part of the application.

- You agree to complete this task as early as possible, as the release of the application is next week

  ● Angular: To develop a front-end application that includes a sign up page, a sign in page, and a landing page

  ● Git: To connect and push files from the local system to GitHub

  ● GitHub: To store the Angular application
