Phase-1 Practice Project: Assisted Practice2

9.Write a program in Java to resolve the diamond problem using OOPs' concepts

-->Source code:

```java
package main;

interface Person
{

    public void getRole();

}

interface Student extends Person
{

}

 class Teacher implements Person
{

    public void getRole() {

        System.out.println(" Class Room Teaching");

    }

}

class ClassRoom extends Teacher implements Student
{

```

```java
}

public class DiamondProb {

    public static void main(String[] args) {

        ClassRoom cc = new ClassRoom();

        cc.getRole();

    }

}
```
